

王思喬

MNetLab

Advisor: Prof. 陳文村

Mail: m0983557762@gmail.com

Phone: 0909802001

Address: New Taipei City, Taiwan

PROFESSIONAL PROFILE

Graduate student in information and communication engineering with experience in communications, machine learning, and intelligent transportation systems. My thesis research focuses on SIoT device selection, grouping, and resource optimization for road safety applications, and I have also participated in laboratory projects related to computer vision, digital twins, and communication technologies.

EDUCATION

M.S. in Computer Science, National Tsing Hua University | Jul. 2023 - Aug. 2025

- **Advisor:** Prof. 陳文村
- **Research Areas:** Social Internet of Things (SIoT); Rate-Splitting Multiple Access; Mobile Edge Computing
- **Thesis Title:** Social Internet of Things Selection and Grouping in Rate Splitting Multiple Access Network

B.S. in Digital Technology Design, National Taipei University of Education | Oct. 2019 - Jun. 2023

- **Advisor:** Prof. 范丙林
- Awarded Second Place and the Innovation Award at the Google Developer Student Club Northern Taiwan Joint Hackathon
- Participated in the 7th Youth Hackathon and CYBERSEC Taiwan

EXPERIENCE

NSTC Project | Nov. 2024 - Aug. 2025

Project Title: AI Agent Model for Hospital Workflow Integration with Knowledge Distillation

Responsibilities:

- Evaluated knowledge distillation against other training methods
- Organized hospital workflow requirements and data
- Defined the AI agent's task scope and dialogue flow

NSTC Project | Sep. 2023 - Oct. 2024

Project Title: Smart Transportation and Incident Prevention System Using Digital Twins

Responsibilities:

- Built and deployed a BevFusion detection model
- Combined vision and LiDAR for detection and tracking
- Developed a GPS positioning system for digital twins

PUBLICATIONS & HONORS

- “Social Internet of Things Selection and Grouping in Rate Splitting Multiple Access Network,” IEEE GLOBECOM 2025 – IoTSN, Accepted.
- 中華電信智慧創新應用大賽暨 5G 加速器徵選活動: Finalist (Digital Twin Smart Transportation Project)

COURSE

Master's:

- 邊緣人工智慧(B)、最佳化理論與應用(B-)
- 計算機圖學(A+)、寬頻行動通訊(A-)
- 物聯網技術與應用(A)、社群網路(B-)、網路安全(A)
- 計算方法設計(B)、作業系統(B-)

Bachelor's:

- 資料結構(A+)、計算機結構(A+)
- 最佳化演算法(A+)、離散數學(A+)
- 數位邏輯設計(B)、電子電路(A+)
- 電腦網路(A-)、軟體工程(B-)、資料庫系統(A+)

SKILLS

- Languages: C/C++, Python
- DevOps & Infra: Git, Docker
- Frameworks: PyTorch, TensorFlow, Matlab
- Databases: MySQL
- Frontend: React, HTML5/CSS3
